

UNIGLAS® | **CLEAN**
The shower glass

Brilliance that stays

Do you know that? No matter how much you clean and polish: Conventional shower glass loses its shine over time. Hard water, soap and cleaning agents affect normal glass: microscopic scratches appear that directly attract limescale, dirt and bacteria. The glass becomes spotty and rough.

Durable protection against dirt

With the innovative UNIGLAS® | **CLEAN** your shower will look like new even if it's many years old. And all that with minimal cleaning effort. During production the surface is already durably refined by a special UNIGLAS®-cooperation process. To ensure your shower is protected against corrosion and ageing for years to come.

A cat wash is enough for your shower

The coating not only reliably protect against corrosion, but also from other harmful influences. Neither hard water, soap residue or detergents can affect your shower. This hugely reduces the cleaning chores. Just wipe with a sponge - and your shower will shine again.

Take it easy with aesthetic ease

UNIGLAS® | **CLEAN** is more resistant than traditional glass. The glass is extremely resilient and at the same time meets the highest aesthetic standards. A perfect combination for use in the shower area and a guarantee for years of enjoyment through guaranteed top quality.

Untreated glass

UNI GLAS® | CLEAN

Despite regular cleaning, the glass of all-glass showers, shower walls and shower cubicles loses its brilliance over time. Small milky, rough spots are formed on the glass surface, where limescale, dirt and health-threatening mould like to accumulate.

An innovative glass finish, produced in the glassworks, protects UNI GLAS® | CLEAN permanently. The glass does not become milky and rough and remains permanently transparent with a smooth surface. Limescale deposits and dirt stick more difficult, making it easier to clean and therefore much more hygienic than untreated glass.

The crystal-clear benefits

- **High transparency and neutral colours**
UNI GLAS® | CLEAN consists of an almost invisible surface finish on clear float glass. As a result it has impressive transparency and colour neutrality, regardless of the thickness of the glass.
- **Long lasting brilliance**
The special surface finish durably protects the glass against glass corrosion and thus preserves shine.
- **Easy cleaning - improved hygiene**
Water drops slide off the surface and leave less limescale behind. Any residues are also easier to clean. Better hygiene means more well-being.
- **Long lasting product features**
UNI GLAS® | CLEAN is manufactured using an innovative procedure which significantly improves the surface of the glass.

The finish is activated through the tempering process and stays durably on the surface without losing its efficiency over time.

USE

- UNI GLAS® | CLEAN was specially developed for use in showers. It can be used for shower and bath walls, rear walls, and all-glass showers.

PROVISIONS/NORMS

- ÖNORM B 3719
- EN 12150-1
- EN 12150-2

PRODUCT VARIANTS (on request)

- in 6 mm to 10 mm
- on white glass
- curved glass
- decorative finishing (coloured varnishing, print, sandblasting etc.)
